SERVICES

EXPERIENCE THE MATTERN & CRAIG DIFFERENCE

Mattern & Craig distinguishes itself in the marketplace by delivering on these important commitments to its clients...

OUR COMMITMENT TO YOU:

- We will deliver personal attention, professional insight and responsiveness unmatched by any engineering firm in our markets.
- A senior, hands-on engineer will serve as the project manager on every project, providing on-the-job project planning expertise, problem solving and accountability.

The fast-paced and ever-changing land development industry requires the engineering consultant to be well versed and experienced in all facets of civil engineering services. The consultant must possess a thorough understanding of the overall development process. Whether it's working with local government officials on re-zonings, site plan approvals, or final project acceptance, or working with state and federal officials for entrance permits, traffic studies, signalization plans, or flood studies, the staff at Mattern & Craig understands the development process. Our staff knows that timing is critical to a project's success.

Today, development projects are more complex than ever. With ever increasing local, state, and federal regulations aimed at regulating development, the Developer needs a team approach to solving problems and ensuring that a project moves forward to completion within the project schedule and budget. From Site Development Feasibility Studies to Final As-built Surveys, the Mattern & Craig team can provide the complete array of services required to meet the Developer's needs.

STUDIES / PLANS

- site development feasibility
- traffic impact assessment
- flood studies
- landscape and tree protection
- development plans and phasing
- stormwater management
- water and sewer infrastructure
- traffic signalization
- roadway improvement
- grading and erosion control

PERMITTING / APPLICATIONS / CERTIFICATIONS

- development review - permitting / approval
- rezoning applications
- project certifications
- zoning appeals (if necessary)

SURVEY

- boundary and subdivision
- topographic and GPS
- ALTA/ACSM
- construction stake-out
- as-built surveys

ADDITIONAL SERVICES

- community meetings
- site marketing and sales exhibits
- fast track design and approval
- construction phase representation
- wastewater pumping / water booster stations
- wetland delineations and permitting

SITE / LAND DEVELOPMENT

SERVICES

Engineering solutions for change and growth.

Regional Knowledge + Engineering Expertise = Project Success

As a regional engineering firm, we provide clients with a powerful combination for project success - 1) first-hand knowledge of the project area and the priorities and concerns of its citizenry; and, 2) depth and breadth of transportation engineering expertise.

We focus on three aspects of land development engineering:

- Planning & Studies
- Design & Engineering
- Construction Engineering Inspection
